

Information on the collection and disposal of ship waste in Austria

Environmentally sound handling of ship waste

Avoiding pollution of soil, air and water requires an environmentally sound handling of ship wastes in accordance with the following principles:

- Waste prevention whenever possible
- Recycling of wastes whenever possible
- Environmentally friendly handling and disposal of non-recyclable waste

Disposal Infrastructure in Austria

Along the Austrian Danube stretch cargo vessels have the possibility to dispose of their ship waste in the provided collection facilities in ports, or a collection services can be organised upon demand.

In addition, via donau – Österreichische Wasserstraßen-Gesellschaft mbH pro-

vides collection containers for recyclables and residual waste free of charge for cargo vessels at 3 locks.

Passenger vessels are required to dispose of their waste in accordance with legal regulations only at the collection facilities provided at passenger landing stages and in winter ports; or the disposal can be organised externally in designated areas.

Sport boats and **pleasure crafts** can use the available disposal facilities in marinas.

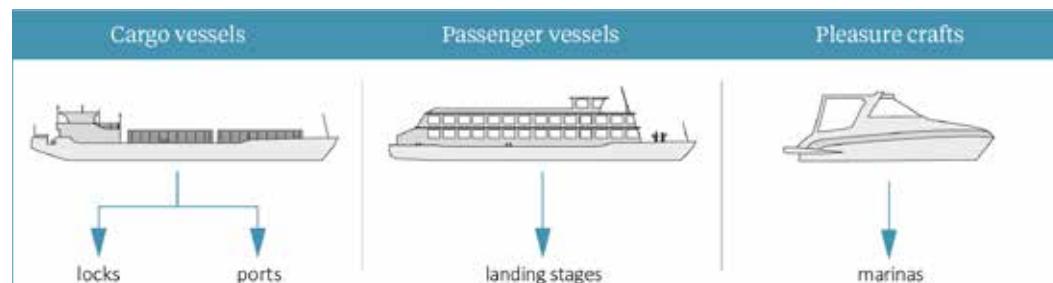

Information

For questions about ship waste management regarding the topics

- types of waste on board
 - disposal modalities and infrastructure in Austria
 - avoidance of waste
 - principles of international ship waste management
- please contact us under the following contact details:

Locks

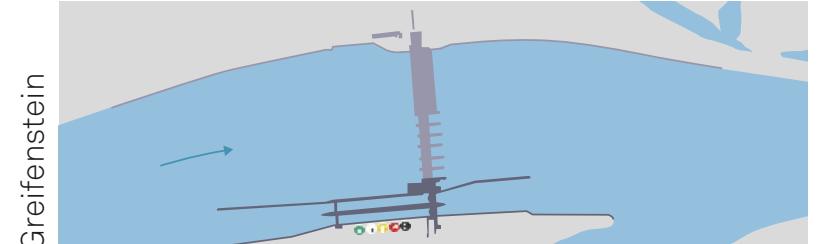

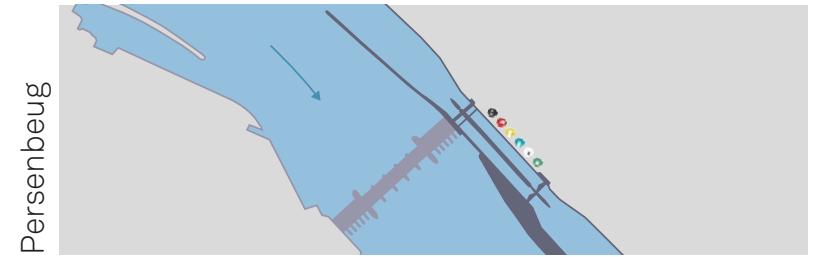

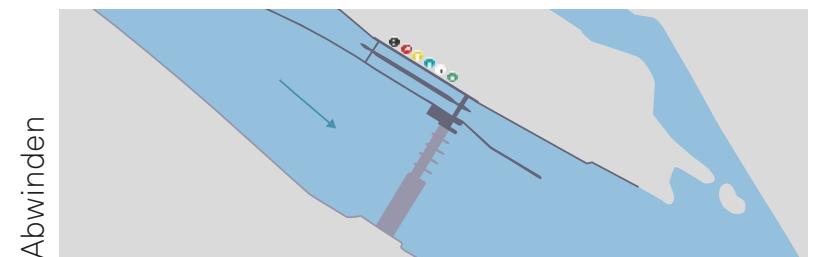

Free waste collection facilities for residual waste and recyclables for cargo vessels are available at three locks along the Austrian Danube stretch:

Abwinden	river-km 2119.60
Persenbeug	river-km 2060.42
Greifenstein	river-km 1949.20

This disposal facility is available for **cargo vessels** only!
The following types of waste can be disposed of free of charge:

Hazardous waste such as oily and greasy waste (e.g. waste oil, lubricants, oil filters) and problematic materials (e.g. batteries, fluorescent tubes, aerosol cans) are not allowed to be disposed of at the facilities at the locks. Some ports may offer the possibility to dispose of hazardous waste.

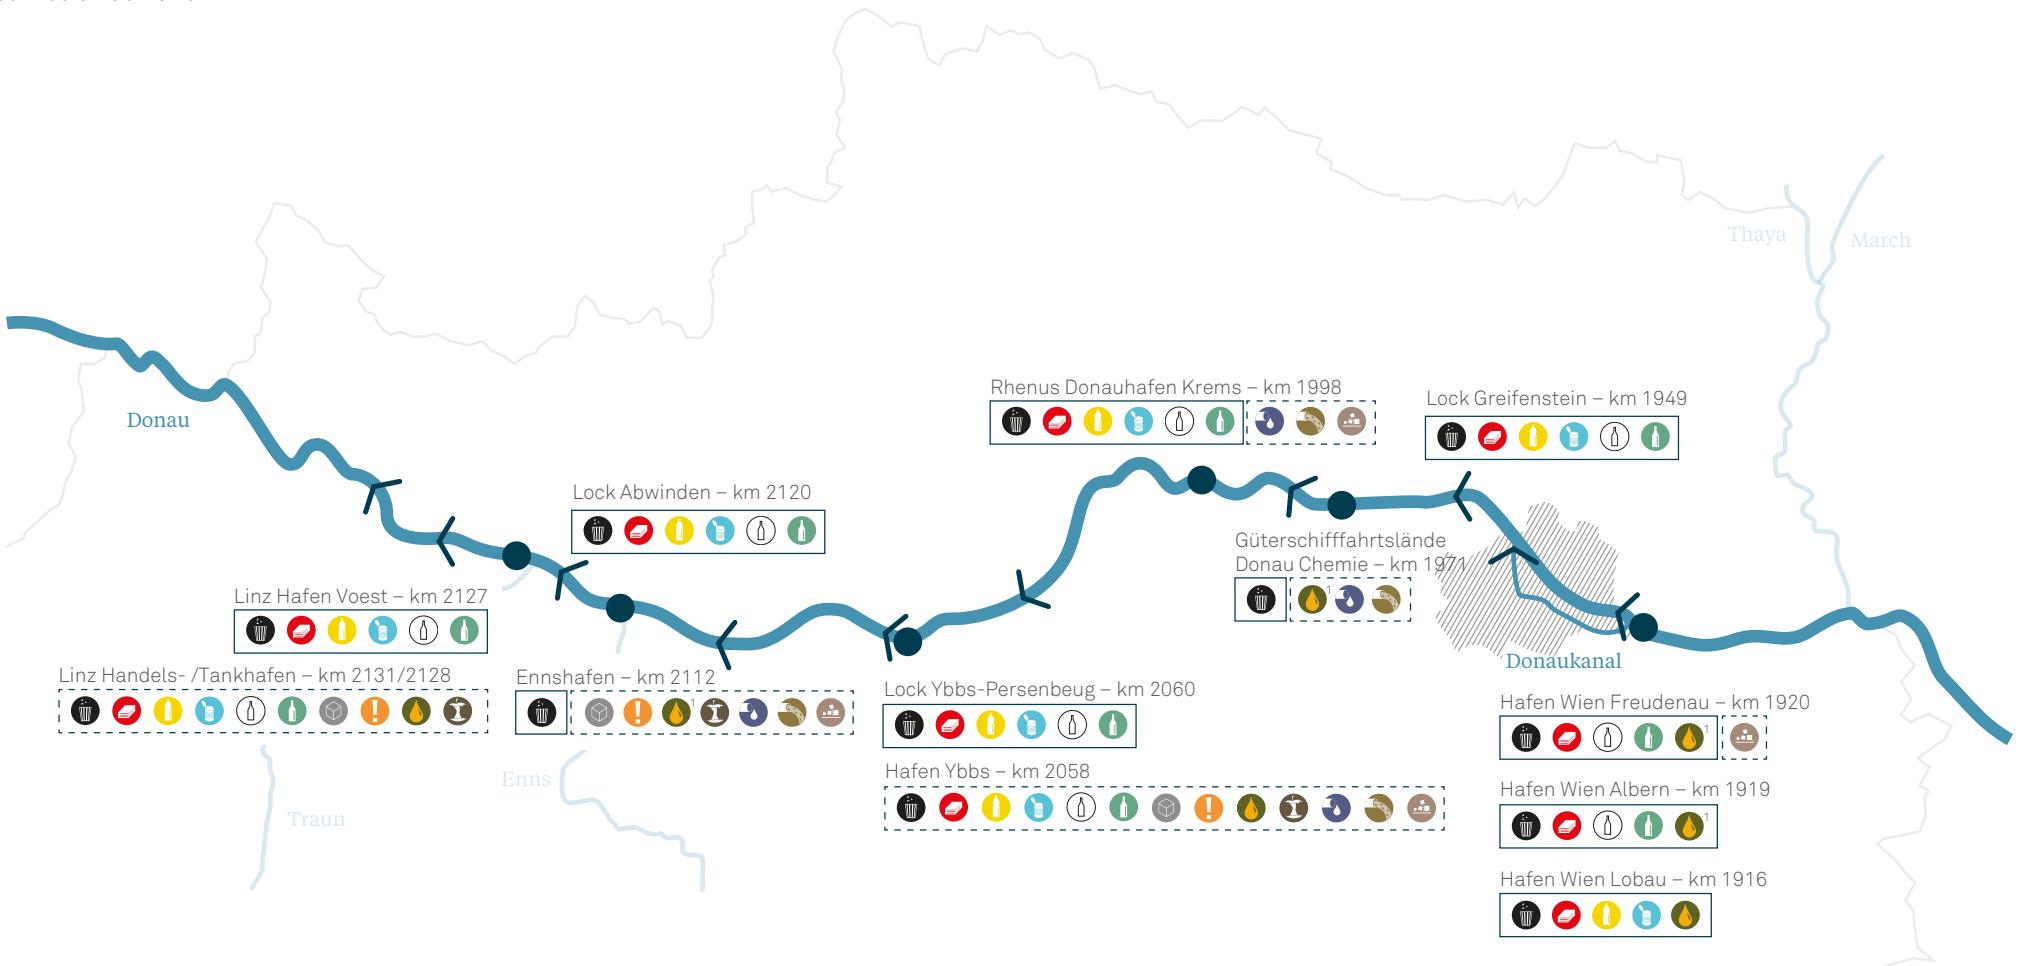

Ports

Disposal infrastructure for ship waste

Along the Austrian Danube stretch there are disposal facilities for household residues at three locks and the following ports provide waste reception facilities for cargo vessels or arrange a disposal service on demand:

- port [Hafen]
 - ◀ lock
 - infrastructure available
 - [] disposal can be organised externally
- residual waste
 - waste paper
 - plastic packaging
 - metal packaging
 - clear glass
 - coloured glass
 - bulky waste
 - problematic was
 - oily and greasy w
 - food leftovers
 - wastewater
 - sewage sludge
 - cargo residuals
- 1) only fluid oily waste

Ports

Disposal infrastructure for ship waste

Along the Austrian Danube stretch the following ports provide waste reception facilities for cargo vessels or arrange a disposal service on demand:

Marinas

Disposal infrastructure for ship waste

For pleasure boats, disposal facilities are available in selected marinas:

- residual waste
 - waste paper
 - plastic packaging
 - metal packaging
 - clear glass
 - coloured glass
 - bulky waste
 - oily and greasy waste
 - wastewater
 - food leftovers
- marina
 - lock
- infrastructure available
 - disposal can be organised externally
